About

- Making things people want for 10 years. Happy to grow self and others
- T-shaped person with roots in backend development
- Passionate Open Source contributor

Open Source Projects

- [lunatic-cat/iproute](#) » #clojure output parser for iproute2 using BNF grammar
- [razum2um/clj-debugger](#) » the missing tool in the #clojure ecosystem
- [razum2um/rails-session_cookie](#) » #ruby the simplest way to get auth in dev / test
- [lunatic-cat/xxhashdir](#) » #golang fast filesystem fingerprinting using xxHash
- [lunatic-cat/realworldapp](#) » #reactnative realworld for mobile applications

Open Source Contributions

- [rubyjedi/soap4r](#) » support new #ruby versions
- [ethereum/go-ethereum](#) » #ethereum allow any vhost in wallet
- [rails/rails](#) » #rails diagnostics in text format for xhr request
- [askbot/askbot-devel](#) » implement several features in #python

Skills

- Programming Languages: [Clojure](#) [Ruby](#) [JS](#) [Scala](#) [Python](#) [Golang](#) [Rust](#)
- Data: [PostgreSQL](#) [Redis](#) [Elasticsearch](#) [Kafka](#) [RabbitMQ](#) [MongoDB](#)
- Web Frameworks: [Rails](#) [Ring](#) [Django](#) [Flask](#) [Express](#)
- Devops: [Docker](#) [Kubernetes](#) [Helm](#) [Ansible](#)
- Blockchain: [Ethereum](#) [Solidity](#) [Truffle](#)
- NLP: [Fasttext](#) [sklearn](#) [pymorphy](#)
- Mobile / Desktop: [React Native](#) [Qt](#)

Experience

- Founder, Lunatic.cat, Moscow (2017 – Now)
 - Lead and participated in development, launch and support of:
 - <https://veeqo.com/> - an all-in-one solution for ecommerce retailers (did everything about OLAP there)
 - <https://brickandportal.com/> - a social commerce platform (lead everything for both web and mobile)
 - <https://verisun.com/> - intelligent transport solutions in Turkey (public transport routing solution)
 - <https://meissa-gmbh.de/> - german devops team (testing framework for devops)
 - <https://deepimpact.ch/> - corporate knowledge base (notification system)
 - <https://health-samurai.io/> - health IT product team (HL7 parser adjustments)
 - cryptosanta.io - anonymous ethereum-based lottery (smart contracts and devops)
 - shryne.com - social health & relationships startup (whole frontend)
 - Technologies got to work on: [Clojure](#) [Ruby](#) [Solidity](#) [React Native](#)

- Backend engineer, Gett, Russia / Israel (2015 – 2017)
 - Refactored monolith to microservices
 - Developed various microservices, including complete solution for pricing strategies
 - Technologies got to work on: `Ruby` `Microservices` `Docker` `Opal.rb`
- Backend engineer, Onlinetours, Russia (2014 – 2015)
 - Added a booking provider
 - Technologies got to work on: `JRuby` `Scala` `Akka`
- Backend engineer, Groupon, Russia (2013 – 2014)
 - Integrated russian department into global company
 - Developed internal API behind global gateway to serve russian deals
 - Technologies got to work on: `Rails` `PostgreSQL` `Elasticsearch` `Kafka` `Storm`
- Fullstack developer, ITC-Labs, Barnaul (2011 – 2013)
 - Lead development of твойбилет.рф - air ticket sales, sarbe gds integration
 - Technologies got to work on: `Ruby` `Resque` `Backbone` `SOAP` `Sabre GDS`
- Python developer, Interaschool, Moscow / Barnaul (2011 – 2011)
 - interaschool.ru - online educational platform
 - Technologies got to work on: `Python` `Django` `PostgreSQL` `Celery`

Other Personal Projects

- I also speak on various tech topics
 - Hacking on clojure.core: **video, en**
 - Podcast: **hardcode.fm host, ru**
 - Lecture in ASU university about blockchain: **slides, ru**
 - Ethereum and smart contracts basics: **video, ru, slides, ru**
 - Intro to ClojureScript: **slides, ru**
- maintain the russian translation of ruby-lang.org the Ruby website
 - Available at **ruby-lang.org/ru**
- the list of awesome Clojure libraries and resources
 - Available at **razum2um/awesome-clojure**
